U. S. TO KEEP WHEAT PLEDGE TO FARMERS

**Senator Gore Says \$2.26 Will Be
Paid, As Promised.**

Washington, Feb. 11.—Senator Gore (Okla.), chairman of the Senate Agriculture Committee, in an address to-day in the Senate declared that the farmers of the United States could rest assured that the Government would keep faith with them in carrying out the guaranty of a price of \$2.26 a bushel for wheat. The Government, he said, should pay the difference between the guaranteed price and the price dictated by the law of supply and demand, for to do otherwise would "create a state of unstable economic equilibrium."

The Presidential proclamation setting the price for 1919 wheat, Senator Gore asserted, "creates an obligation against the Government—an obligation which is held as inviolate as that which is held as inviolate as that of a Thrift Stamp or a United States bond."

Of two methods of carrying out the guaranty—requiring the consumer to pay the difference between the fixed price and the price in the unregulated market and authorizing the Government to pay this difference, Senator Gore said economic considerations recommend the latter.

Price fixing as regards wheat, he said, had not been successful. It had caused a loss, he said, of \$800,000,000 to the farmers in two years, with only a "slight individual saving when distributed among the millions of consumers." To the average family, he said, less than \$15 a year on the bread consumed had been saved.

VIC PILE BUYS RECORD PRICE HOGS \$1,500 FOR TWO GILTS AND ONE SOW

Vic Pile returned last week from a hog sale in Minnesota where he purchased three hogs at an average of about \$500 each. This is a high price for hogs but considering their quality and breeding they are cheap. Mr. Pile says "These are absolutely the best bred and the best individuals that ever came South. I bought the best there was in the sale and got the best hog judge in Minnesota to help

me select them." The sow is sired by the \$6,600 Geradale Jones and is bred to Black Price the Champion of the world. The two gilts are sired by Big Price's Equal, the hog that has won more grand Championships than any hog living. They are also bred to Black Price, the present Grand Champion. Breckinridge County will be heard from at the Fairs next fall when it has hogs like these in the county.

Correction In J. C. Nolte's Ad.

The Breckinridge News desires to make a correction in regard to the last week's advertisement of J. C. Nolte & Bro. This was a typographical error, and in reading this week's ad it will be noticed that a correction has been made.

TO THE FARMERS OF BRECKINRIDGE COUNTY

Hardinsburg, Kentucky, Feb. 11th, 1919. The Farmers of Breckinridge County have not as yet awoke to a realization of the benefits to be derived from the establishment by the Government of the Federal Land Bank System.

This system in short is for the purpose of loaning money to Farmers on long time, and a low rate of interest with land as the security.

I have inquired about this matter from time to time from Farmers who may wish to borrow money to buy land or improve what they already own.

In order for the farmers to get the benefit of this plan which is plainly devised in and for their interest, it is first necessary to organize a farm loan association, which will borrow as much as \$20,000.00.

There have been some two or three organizations effective in the County, but none as yet at the county seat.

Most of the work incident to getting a loan is done at the county seat such as making the abstract of title, and it would be convenient for any one wishing to join such an organization to have his membership at the county seat, and I have been request-

ed to effect such an organization here if there are enough farmers in the county interested in the matter to put it on foot.

It is unnecessary to undertake any argument as to whether the Federal Land Banks are proving beneficial to the farming interests, as that matter is already well established in the minds of farmers who are well advised and progressive.

I fully realize however, that the farmers are the first people hit in the adjustment and change of prices, and they ought by this time to be awake to a realization of the fact that they should grasp every opportunity to improve their conditions. In view of this fact it may be time wasted to offer money, loaned on long time and at a lower rate of interest than is charged elsewhere, but as there appear to be some farmers who are getting interested in the matter I will say to all such that if they will call at my office or drop me a line indicating their interest I will in the near future call a meeting of those thus interested for the purpose of organizing a farm loan association at this point. Very respectfully,

James R. Eskridge.
